

ENTOTEM

One-stand graphometric kiosk featuring the latest technologies and graphometric signature function or facial recognition via webcam, providing the customer with an automatic identification system.

The workstation does not require the presence of an operator and allows the customer to interact independently from the creation of the files to the closure of contracts.

Furthermore, thanks to the smart card reader, any card meeting the ISO/9594-8 (X.509) requirements (ID cards, residence permits, etc) can be inserted so that the customer is identified and the forms are automatically compiled.

These devices allow also the graphometric signature of documents through the built-in ENsign10 or ENsign11 signature pads, which are developed by EURONOVATE specially for this purpose.

PRODUCT SPECIFICATIONS

Basic Information

- Dimensions: 156 x 60 x 50 cm (h x l x d)
- Material: Steel structure
- Finish: Pure white, opaque

Display

- Main Monitor: 23" Touch 16:9, 1920 x 1080
- Secondary Monitor: 10" With graphometric pen 16:9, 1024 x 600

Equipment

- Card reader for cards: 5V, 3V and 1.8V, ISO / IEC 7816 Class A / B / C (eg health card)
- MiniPC fanless

Connectivity

- Wifi
- RJ45 network socket

Software

- Software package included

Power

- AC 230V
